I'm sorry. I got into the conversation but got interrupted. I'm gone. Warren will have to discuss this.

Any news?
We will probably have a maximum number of 15.

We'll have to check with what they set up for capacity.

Subject: Question - Air Sample Analyses from within ASPECT cabin

Greg,

It is my understanding that Region 6 is initiating a purchase order with local laboratories to provide alpha spectroscopic analysis of air filters for Americium, Plutonium, Thorium and Uranium. During the ASPECT

flights we are performing some low volume air sampling within the aircraft. We anticipate having 20 or so filters that would require analysis. Would it be possible to send our air filters through that regional contract for analysis?
